

Peanuts

Whole peanuts contain high amount of Protein and high concentrations of antioxidant polyphenols. Peanut is a good source of Coenzyme Q10 which protects the heart during the period of lack of oxygen example high altitudes and clogged arteries. Peanuts high niacin content helps in the recovery of cell damage provides protection against Alzheimer`s disease and age-related cognitive problem. Peanut contain Vitamin E , a powerful antioxidant that is shown to significantly reduce the risk of cancer and cardiovascular diseases. Even small amounts of Peanut to the diet can reduce LDL (bad) and cholesterol by 14%. Peanut is rich in calcium which helps promotes healthy bones. Our Indian Peanuts are well placed in International Markets for its quality and taste.
